

th? Meet Honeywell S&C.

Honeywell S&C offers insight and innovation unavailable with our competitors:

Comprehensive Portfolio: Want all you need, and more? S&C brings you one of the broadest switching and sensing portfolios on the planet. No compromises. No concessions. Just an amazing breadth of solutions from Honeywell's array of technology platforms — which eliminates the need for multiple suppliers. It's the convenience of one contact, along with the peace of mind delivered by the industry leader.

Knowledge and Expertise: It might be modifications to an existing design, or it might be what you need doesn't exist — no problem either way. Honeywell S&C can engineer custom solutions to meet your specific needs, demands

and dreamed-up designs. Even better, our products are backed by continual engineering innovation, technology advancement and solutions development. All designed to be able to meet and beat the most demanding environments. It's been that way for more than 75 years.

Global Distribution Channel: Honeywell not only delivers products designed to specific and essential necessities, integrating switching and sensing technologies into application-specific packaging — but wherever you do business, we're already there doing it. Our global workforce offers sales, application and service support to more than 70 locations worldwide.

MICRO SWITCH Corporation (the inventors of the original MICRO SWITCH™ product) became Honeywell Sensing and Control in 1999. But after three-quarters of a century of service, the durability and efficiency of the Honeywell MICRO SWITCH™ technology is still astonishing by any standard — and Honeywell now manufactures over 120 million MICRO SWITCH™ products each year. Simple, superior, irreplaceable — the MICRO SWITCH™ product cycles on. And on.
